

**Attention Southeast Dealers** - ALCOM Aluminum Trailers has a new plant coming and it's in your area! After extensive searching for the right location to open our southeast branch we have decided on the state of Florida. The opening of our new plant will allow us to provide our top of the line aluminum trailers to our dealer network faster and more cost effective.

Since 2006, ALCOM has manufactured top quality, all aluminum trailer solutions for nearly every major market segment. From ATV and utility trailers to car haulers and contractor options, our portfolio exceeds 900 standard models across 9 brands. Combining a robust dealer program with expanded manufacturing capacity across three production facilities, ALCOM offers the industry's best lead times and deepest product catalog.

In anticipation of the opening of our 4th plant location in the Southeast in the Spring of 2021. ALCOM is excited to make the below freight program available to potential dealers. Freight will be based off of your Mileage from Gainesville, Florida. Mileage cost will be \$2.60 per mile. Minimum freight-bill will be \$300. To qualify Full-load orders only (minimum of \$15,000 on truck).
